

Spa Fleet – Mobile Sauna Rental

For immediate release.

Spa Fleet Opens Sauna Rental Business

Kingston, NY – December 21, 2018

Spa Fleet is a mobile spa rental business, which serves the Mid-Hudson Valley, the Catskill Mountains, the tri-state area of New York – New Jersey – Connecticut, and beyond. The company's Finnish-style sauna *Cloudberry* is ready to go on the road and meet sauna enthusiasts at a location of their choice.

Following the inaugural sauna event at Kingston, NY's *O-positive Festival* in October, the last finishing touches have been added to complete Spa Fleet's mobile sauna *Cloudberry*. The structure was built on a 7-foot by 14-foot trailer and it looks much like a tiny house, clad in cedar wood inside and out. It features a spacious changing room and enough bench space to comfortably seat up to eight sauna bathers at a time. The heat source is a Finnish-made sauna wood stove with 80 lbs. of sauna rocks in its top compartment, which provide even heat and are used to generate (optional) steam.

The sauna was designed with off-grid use in mind, and it comes with battery-powered lighting and a ready supply of firewood, which will last for several sauna bath sessions.

The business organizer, Henning Grentz, has been a life-long aficionado of the dry Finnish-style sauna. Over the past 16 months, he turned his dream of sharing this passion with others at a location of their choice into a reality. Spa Fleet delivers the sauna to their customers at any safe and accessible location.

Spa Fleet Rental is a division of Sweet Sweat Fleet, LLC. Spa Fleet rents mobile sauna equipment, and occasionally hosts public sauna events.
